

We are pleased to invite you to submit your papers to AspiT'16 in any of the areas of interest for this workshop. Submitted papers must be written in English. The paper should not exceed 8 pages in length, including all figures, tables, and references (using the Template A4.doc).

All submissions will be reviewed on the basis of relevance, originality, importance and clarity.

Topics include but are not limited to:

We are pleased to invite you to submit your papers to AspiT'16 in any of the areas of interest for this workshop. Submitted papers must be written in English. The paper should not exceed 8 pages in length, including all figures, tables, and references (using the Template A4.doc).

All submissions will be reviewed on the basis of relevance, originality, importance and clarity.

Topics include but are not limited to:

- Signal and Image Processing.
- Audio, Speech and Music Processing & Coding.
- Digital signal Processing for communications.
- Communication and cooperation through mobile multimedia.
- Advances in Multiuser MIMO Systems, beamforming, MIMO, massive MIMO.
- OFDM, multi-carrier modulation.
- Cognitive radio, spectrum sensing.
- Channel modeling, characterization, and estimation.
- Modulation, coding, diversity, equalization, synchronization.
- Wireless and Mobile communications, 3G, 4G and 5G.
- Ultra wideband, mmWave, and sub-THz communications.
- Wireless sensors Networks, Localization for wireless networks.
- Kernel methods, neural networks and adaptive information processing systems.
- Multivariate statistical techniques.
- Multichannel adaptive and nonlinear signal processing.
- Multiset data analysis and multimodal data fusion.
- Blind signal separation, signal localization.
- Cooperative sensing, compressed sensing, and sparse signal processing.

Prospective authors are encouraged to submit papers for evaluation by the Program Committee.
