The Third International Conference on Smart City Applications (SCA 2018) is a multidisciplinary international conference organized by the Mediterranean Association of Science and Technology (*MediAST*) in collaboration with the the Faculty of Sciences of Tetouan (**FST**).

Smart City is a new approach that covers clean technology and information technology as it relates to science, healthcare, transportation, corporate sustainability, architecture, and other domains

http://www.medi-ast.org/sca18/index.html

SCA'18 will take place in Tetouan, Morocco from 10 to 11 October 2018.

The Conference is a forum for scientists, health researchers and industrial engineers to discuss and exchange experimental or theoretical results, novel designs, work-in-progress, experiences, case studies, and trend-setting ideas in the area of smart City. Papers with new research results and new products or concepts are encouraged for submission.

All accepted papers for presentation will be published in the **Springer LNNS series** and will be available in **SpringerLink Digital Library**.

Topics covering industrial issues/applications and academic research include, but are not limited to:

Smart Cities
- Intelligent Transportation Systems and Smart Mobility
- Urban Logistics Innovations,
- Smart Grids,
- Territorial Intelligence,
- Smart Citizens & Educational Sciences,
- Intelligent Governance & Digital Policy,
- E-Administration & E-Services,
- Smart Economy and Digital Marketing

- Sustainable Development,

Smart Building and Home Automation

- Smart Electrical and Electronic devices,
- Automation,
- Embedded Systems,
- Renewable Energy Systems,
- New Approaches in Lightings,
- Robotics,
- Wireless Sensors Networks,
- Antennas & RF Devices,
- Signal Processing,
- intelligent building assessment,
- Green And Intelligent Construction,
- Sustainable building design.

Smart Earth

- Natural Disasters Monitoring ,
- Damage Mapping,
- Smart Agriculture
- Hazard Mapping,
- Climate Monitoring,
- Emergency Response,
- Disasters Early Warning System
- Smart Water Management,
- Clean-up Technologies,
- Clean Energy,
- Geographic Information,
- Smart & Sustainable Environments,

Information Technologies and Computer Science

- Big-data and Data Mining,
- Decision-Making,
- Cloud Computing,
- Hardware Engineering,
- Quantum Computing,
- Machine Learning,
- Mobile Technologies
- Natural Language Processing,
- Image, Video and Speech Processing,
- Digital Forensics,
- HPC & Parallel Computing,
- Network Technologies &Wireless Communications,
- Collaborative & Complex Networks,
- Serious Games,
- Vanet,
- Internet of Things IoT

Extended versions of selected papers will be published in:

- International Journal of Intelligent Enterprise
- International Journal of Information Systems and Social Change
- International Journal of Smart Grid and Green Communications
- International Journal of Big Data Intelligence

Important Deadlines:

Paper Submission Deadline: **May 15, 2018**
Notification of Paper Acceptance: **June 15, 2018**
Camera Ready Paper Submission: **July 15, 2018**
Authors Registration Deadline: **July 30, 2018**
Conference Date : **10 – 11 October 2018**

Paper Submission

Authors are invited to submit original and unpublished regular papers of up to 10 pages (including references) in scholarly English, using the Springer template.
